

# Antenna Warfare:

## 14-Day Hands-On Mastery of Design, Optimization & Deployment

The most comprehensive RF and antennas course available for all levels.

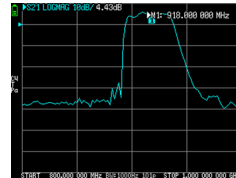

**Understanding the whole system is the difference between success and failure!**

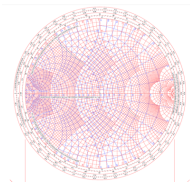

**Be a smarter Consumer!**

**Build and Test  
High-Performance  
Antennas**

**Understand the  
entire RF System,  
how to test it, and  
how to deploy it.**

**Learn to Build  
Matching Networks for  
More Efficient  
Operation**

The Workshop is a fully immersive two-week course taking students from basic antenna concepts and construction to array systems, professional testing, and culminating in the design and construction of small antennas. RF system design and testing involving amplifiers and filters along with the ability to test insertion losses and overall system performance.
